

A THANK YOU TO OUR VOLUNTEERS

Norfolk Island Regional Council would formally like to thank the following two groups of volunteers who have worked in improving Norfolk Island's Public Reserves over the last number of months.

The Coral Berry Crusaders (part of the Norfolk Island Flora and Fauna Society)

– thank you in particular to Judith Anderson and her regular group of volunteers who have worked tirelessly each week in removing Coral Berry weeds from Hundred Acre Reserve. This will improve opportunities for native vegetation to establish in the Reserve. A special congratulations for recently completing a full 'sweep' of weeds from Hundred Acres, a dedication to the group's commitment.

Community Tree Planting Day Volunteers – thank you to all community members who have provided their time and assisted so far in the revegetation of both Two Chimneys and Ball Bay Reserves. This work will enhance areas of biodiversity and improve ecological values in the Reserves. A special thank you to Lilli King who has dedicated her time in organising the Community Tree Planting events, including upcoming events at Bumboras and Cascade Reserves.

Council expresses its sincerest thanks to these groups of volunteers and looks forward to working with those and others in the future to deliver environmental outcomes for Norfolk Island's Public Reserves.

Andrew Roach

General Manager – Norfolk Island Regional Council
