

## **Thank you Nev – and an open invitation to visit Memorial Park**

NIRC and the community at large would like to thank Mr. Neville Bigg for the outstanding works he's done to the Memorial Park on Fay Bataille Road in the last few weeks.

He converted an old and dilapidated concrete wood fired BBQ into a functional wooden table top to be used as table to service the food/picnic items under the shelter. He also cleaned up the neglected garden beds and grass lawn from the overgrown undergrowth and weeds. The shelter roofing has also been extended and the entire shelter has been re-painted.

The current state of Memorial Park has been reinstated to its former glory and the visitors and local families can now enjoy using this park again for recreational/picnic purposes.

On odd occasions Neville would take a break from his normal task and lend a hand to the Roads crews when required. The recent example of this was helping Reynaldo Hissler from the roads crew to cut/clear the overgrown vegetation at the sides of Mission Road. Again, this display of teamwork/multi-tasking shows the initiative and pride in transforming the way we do business to a better and more efficient system which aligns with Council's Transition to Sustainability (TtoS).
